

CONTENTS

INTRODUCTION	11
I. CONCEPTS AND THEORIES	
1 A METHODOLOGICAL STUDY FRAME DEFINITION OF THE PROBLEM OF ORGANISATIONAL KNOWLEDGE MANAGEMENT SYSTEMS DEVELOPMENT	29
1.1 Knowledge Management in Knowledge based Organisations	29
1.1.1 <i>KM - Organisational Perspectives</i>	29
1.1.2 <i>KM Taxonomy</i>	32
1.1.3 <i>Organisational Knowledge and Learning</i>	36
1.1.4 <i>KM Functions in an Economic Organisation</i>	37
1.1.5 <i>KM – A Paradigmatic Strategic Change for Organisations</i>	40
1.2 Analysis of the Design Requirements for KMS Tools	44
1.2.1 <i>Knowledge Management in the Design Perspective</i>	44
1.2.2 <i>Design Requirements of Socio-technological Knowledge Management Systems</i>	45
1.2.3 <i>KMS Design as a part of Distributed Collaboration System</i>	48
1.2.4 <i>KMS and Technological Infrastructure of Virtual Organization</i>	51
1.2.5 <i>KM Processes supported by ICT in a KMS: Knowledge Creation, Storage, Transfer and Application</i>	55
1.2.6 <i>KMS Tools</i>	62
1.3 Conclusions to this Chapter	63

2 DESIGN METHODOLOGIES AND TECHNOLOGIES OF KMS TOOLS	65
2.1 Characterization of Artificial Intelligence Methods and Techniques	65
2.1.1 <i>Artificial Intelligence Methods and Techniques System</i>	65
2.1.2 <i>Methods and Techniques for Knowledge Acquisition</i>	69
2.1.3 <i>Methods and Techniques for Knowledge Representation</i>	72
2.1.4 <i>Methods and Techniques for Knowledge Utilization</i>	74
2.2 Role of the Network Technologies in the KMS Implementation	76
2.3 Web Services – the Present Paradigm in the Distributed Applications Development	77
2.4 Ontologies – Definitions and Classifications	84
2.5 Fundamental Concepts of Information Systems (IS)	94
2.6 Modelling in the Context of Information Systems	105
2.7 Role of Ontologies in Information Systems Meta-modelling	108
2.8 Semantic Web and Web Ontologies for KMS	112
2.9 Conclusions to this Chapter	117
3. INFRASTRUCTURE MODELS FOR KMS TOOLS DEVELOPMENT	121
3.1 General Considerations	121
3.2 General Architecture for Integration of the Socio-technological System in the Environment of Organizational Business Processes	126
3.3 Characterization of some Firm Software Systems that integrate Organisational KMS	133
3.3.1 <i>IBM SmarTeam, Solution in the Product Data Management Domain</i>	133
3.3.2 <i>Software System Business Process Framework of the ORACLE Firm</i>	138
3.3.3 <i>KM Solution based on the IBM Lotus Team Workplace Application</i>	140
3.3.4 <i>Architecture of Effective-KM System, Solution of Effective-i Firm</i>	142
3.4 Present Approaches in the Knowledge Infrastructures Design for Knowledge Organisations	145

KNOWLEDGE MANAGEMENT SYSTEMS
Concepts, Case Studies

3.5 Software Technologies of Data Integration for BI Solutions	151
3.6 Data Warehouse Evolution to Knowledge Warehouse	155
3.7 E-governance Model based on KMS	161
3.8 Conclusions to this Chapter	166
4 WEB INTERFACES MODELLING FOR SOCIO-TECHNOLOGICAL KNOWLEDGE SYSTEMS IN KNOWLEDGE ORGANIZATIONS	169
4.1 General Presentation of Web Interfaces of Socio-technological Knowledge Management Systems	169
4.2 Web Portals: Terminology, Classification, Examples of Architectures and Implementations	174
4.2.1 Terminology	174
4.2.2 Portal Classification	175
4.2.3 Web Sites Design – General Characterization	176
4.2.4 Portals based on Portlets	178
4.2.5 Value Chain for Portals Development	183
4.3 Knowledge Portals – Interfaces of the Systems that implement Knowledge Strategies for Knowledge Organizations	184
4.4 Specifications of Portal Solutions based on the DotNetNuke® Model	189
4.5 Conclusions to this Chapter	198
II. CASE STUDIES	
5. DEVELOPMENT OF A PILOT SYSTEM FOR SUSTAINING MANAGEMENT PROJECT ACTIVITIES IN A VIRTUAL ORGANIZATION	203
5.1 Introduction in the Project Management Domain	203
5.2 Modelling and Architectural Design of a Collaboration Information System for PM	214
5.2.1 Integration Model of Project Management Information Systems	214
5.2.2 Functions of Management Knowledge Systems as Part of PM Collaboration Systems	220
5.2.3 Architecture of Software Applications for Organizational PMIS	224
5.2.4 Educational System Model of PMIS	227
5.3 Implementation of a Pilot Cooperation System for supporting PM Activities	236

5.3.1	<i>Design Specifications of a Social Infrastructure for a Collective Learning Activity</i>	236
5.3.2	<i>Architecture of the Pilot Software System (CHART), as a Part of the Integration Model PMIS</i>	238
5.3.3	<i>Usage Scenarios of the CHART System</i>	243
5.4	Conclusions to this Chapter	247
6	ARCHITECTURE DEFINITION OF AN EXPERIMENTAL KNOWLEDGE MANAGEMENT SYSTEM DEDICATED TO SCIENTIFIC VIRTUAL COMMUNITIES	249
6.1	Knowledge Management Features for Scientific Virtual Communities	249
6.2	Architecture of the Experimental Knowledge System dedicated to Scientific Virtual Communities	252
6.2.1	<i>Development Phases of KM Systems</i>	252
6.2.2	<i>Objectives of the Experimental KMS</i>	256
6.2.3	<i>Functions of the Experimental KMS Modules</i>	257
6.2.4	<i>Modular Architecture of the Experimental KMS</i>	261
6.3	Innovating Aspects and Risk Factors in the Definition of the Virtual Scientific Communities KMES Architecture	264
6.4	Conclusions to this Chapter	272
7	SPECIFICATIONS FOR REALIZATION OF THE KMES-EDU MODULE, AS PART OF THE EXPERIMENTAL KNOWLEDGE MANAGEMENT SYSTEM DEDICATED TO SCIENTIFIC VIRTUAL COMMUNITIES	274
7.1	Research Directions for the Design of the Adaptive Instructional System KMES-Edu	274
7.2	Definition Specifications of the Prototype Solution KMES-Edu	276
7.2.1	<i>Analysis of the Instructional Necessities</i>	276
7.2.2	<i>General Architecture of a Modular Educational System</i>	277
7.2.3	<i>Specific Problems of the Design of an Instructional System with Educational Reusable Modules</i>	279
7.2.4	<i>Model Development of instructional Design for the Prototype Solution KMES-Edu</i>	291

KNOWLEDGE MANAGEMENT SYSTEMS

Concepts, Case Studies

7.2.5	<i>Architecture of the Prototype E-learning Solution KMES-Edu</i>	291
7.3	Realization Specifications for the Components of the Prototype Solution KMES-Edu	294
7.3.1	<i>Educational Strategies in Use</i>	294
7.3.2	<i>Learning Management System (LMS) for KMES-Edu</i>	298
7.3.3	<i>Structure of the Educational Objects in KMES-Edu Solution</i>	301
7.3.4	<i>Realization Specifications for Description of the Instructional Module Format KMES-Edu</i>	312
7.4	User Interface and Roles' Management in System	318
7.4.1	<i>Stages in User Interface Design</i>	318
7.4.2	<i>Roles' Management in System; Description of the Authorization System</i>	320
7.4.3	<i>Role of the Tutor Interface in Development and Management of Educational Modules</i>	322
7.5	Conclusions to this Chapter	324
8	DEFINITION OF THE SOFTWARE INFRASTRUCTURE ARCHITECTURE FOR A WEB PLATFORM DEDICATED TO EUROPEAN VIRTUAL COMPETENCE CENTRES	326
8.1.	General Considerations	326
8.2.	The Concept of Virtual Competence Centre	328
8.2.1.	<i>The Conception Stages of a Virtual Competence Centre (VCC) and Afferent Problems</i>	328
8.2.2.	<i>Collaboration in a VCC and Knowledge Economy</i>	330
8.2.3.	<i>Knowledge Management Functions in a VCC</i>	331
8.2.4.	<i>Features of a VCC System</i>	333
8.3.	Technical Infrastructure of a VCC Platform	336
8.3.1.	<i>General Considerations of Software Architectures for VCC Platforms</i>	336
8.3.2.	<i>Role of the Business Model in the Architectural Design of the VCC Platform</i>	337
8.3.3.	<i>Distributed Collaboration Functions of the VCC Systems defined in Architectural Design</i>	338

Contents

8.3.4. <i>Software Infrastructure Architecture for a VCC</i>	340
8.4. Case Study: VCC Platform of NoE ProLearn	345
8.4.1. <i>General Presentation of ProLearn VCC</i>	345
8.4.2. <i>Requirements Analysis for ProLearn VCC</i>	347
8.4.3. <i>Construction of the Functional Infrastructure for ProLearn VCC</i>	348
8.5. Conclusions to this Chapter	353
