

RAPORT ȘTIINȚIFIC proiect complex ReTeRom, etapa I - noiembrie 2018

Proiectul 1: COBILIRO

Activitatea A1.1.3 Management și diseminare

Denumire Etapă: **Acțiuni preparatorii realizării unui corpus bimodal (vorbitură/text) pentru limba română**

Responsabil: UAIC, UTCN

REZUMATUL ETAPEI

A patra etapă a proiectului 1 COBILIRO urmărește diseminarea rezultatelor, fiind un proces planificat centrat pe prezentarea rezultatelor obținute în etapele precedente, totodată a inițiativelor partenerilor către actori-cheie vizați (ex. mass-media).

Rezultate Etapa: Activități suport - Diseminare și participare la manifestări tehnico-științifice, inclusiv în mass-media

În această etapă procesul de diseminare a implicat aducerea la cunoștința grupului țintă (lingviști, informaticieni, studenți etc.) a rezultatele proiectului de până acum. Pentru diseminarea rezultatelor în mod eficace, s-a stabilit o procedură adecvată încă de la începutul proiectului care s-a bazat pe un set de șase întrebări-cheie (*de ce, ce, cum, când, către cine și unde* va avea loc diseminarea rezultatelor, atât în timpul perioadei de finanțare cât și după aceasta).
